

Development and implementation of solutions in the fields of electrical engineering, IT, safety & security

ECCOS Group

DECCOS GmbH - member of ECCOS Group

28
years in business

€30.000.000
yearly income

2000
completed projects

Complete Engineering Service

CONSULTANCY regarding the conceptual solution design

PROJECT DESIGN AND IMPLEMENTATION of complex systems

DEVELOPMENT OF OWN SOFTWARE AND HARDWARE SOLUTIONS

24/7 MAINTENANCE of installed systems

Standards and Certifications

ISO 9001 - Quality Management System

ISO 14001 - Environmental Management System

ISO 45001 - Occupational Health and Safety Management System

Activities

DATA CENTERS

Comprehensive energy systems (electrical and mechanical engineering) for safe and continuous hardware operation

AUTOMATION

Central control and monitoring systems in industry and building construction, various measuring and control methods, instrumentation

ENERGY EFFICIENCY

Energy management systems: power quality monitoring, peak reduction; monitoring of non-electric energy sources (water, steam, gas)

SAFETY AND SECURITY

Integration software, video surveillance, intrusion detection, fire alarm and gaseous fire suppression, access control, key management, access to computer resources

SOFTWARE DEVELOPMENT

Advanced and comprehensive software solutions for the establishment of a company security system and maintenance management, smart city enablement; with emphasis on system integration

Partners

Software Development

Central Security Point

Advanced integration platform
for centralized monitoring
and management of all physical
security and fire protection
systems

OPEN PLATFORM – quick and easy
integration of various systems

MODULAR DESIGN – flexible and
adaptable to specific user needs

References

European Commission

Supply and installation of access control, intrusion detection, CCTV, and remote management security equipment, as well as upgrading and maintaining technical security systems in buildings used or managed by the European Commission; nearly 80 buildings in Belgium and 16 buildings in Luxembourg, with the continuous construction of new ones.

Bouygues Travaux Publics

Equipping both tubes of the Učka Tunnel, with a combined length of more than 10 kilometers, with state-of-the-art systems for power supply, lighting, signaling, ventilation, fire protection, communication, and video surveillance, as well as traffic and energy management and control, to achieve the highest standards of traffic safety within the tunnel.

Digital Realty

Design and implementation of Infrastructure Management Systems (BMS) and Power Management Systems (PMS) for the construction of large-scale data centers in Frankfurt, ensuring high efficiency and reliability of data center operations.
